Prólogo

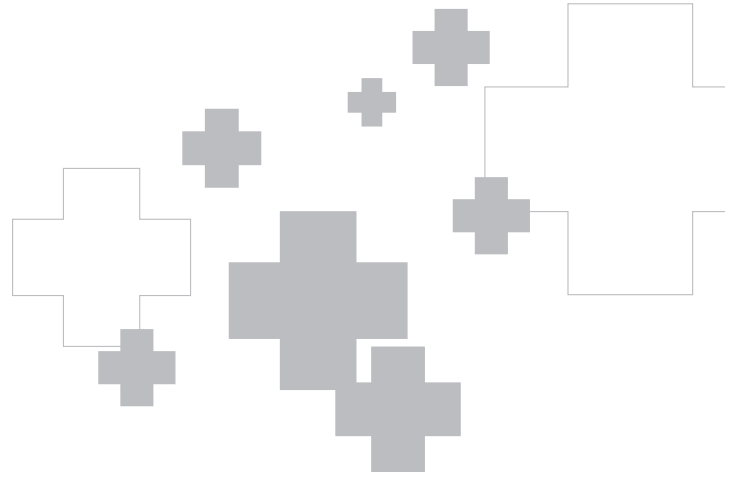

La información y documentación sanitaria crece a un ritmo exponencial y los profesionales de la salud necesitan estar actualizados en los diversos campos de la medicina para mantener y mejorar su competencia profesional. Esta actualización de los conocimientos correspondiente al campo de la autoformación se completa con la realización de actividades de formación continuada, docencia, investigación, así como con la propia experiencia adquirida en el ejercicio de su profesión.

El sistema sanitario debe proporcionar a sus profesionales los medios suficientes para garantizar el acceso a la información sanitaria. Los sistemas tradicionales basados en bibliotecas presenciales, mediante la lectura y consulta de los ejemplares de las revistas que almacenan, no aseguran que la información llegue a todos los profesionales de la salud en tiempo adecuado.

Por ello, el desarrollo de las nuevas tecnologías (Internet, intranet, bases de datos, revistas sanitarias on-line) ha facilitado el acceso de los profesionales sanitarios a los últimos contenidos, tanto de las áreas del conocimiento de ciencias de la salud, como de otras materias necesarias para el desempeño de sus funciones, así como la consulta de las bases de datos desde su puesto de trabajo.

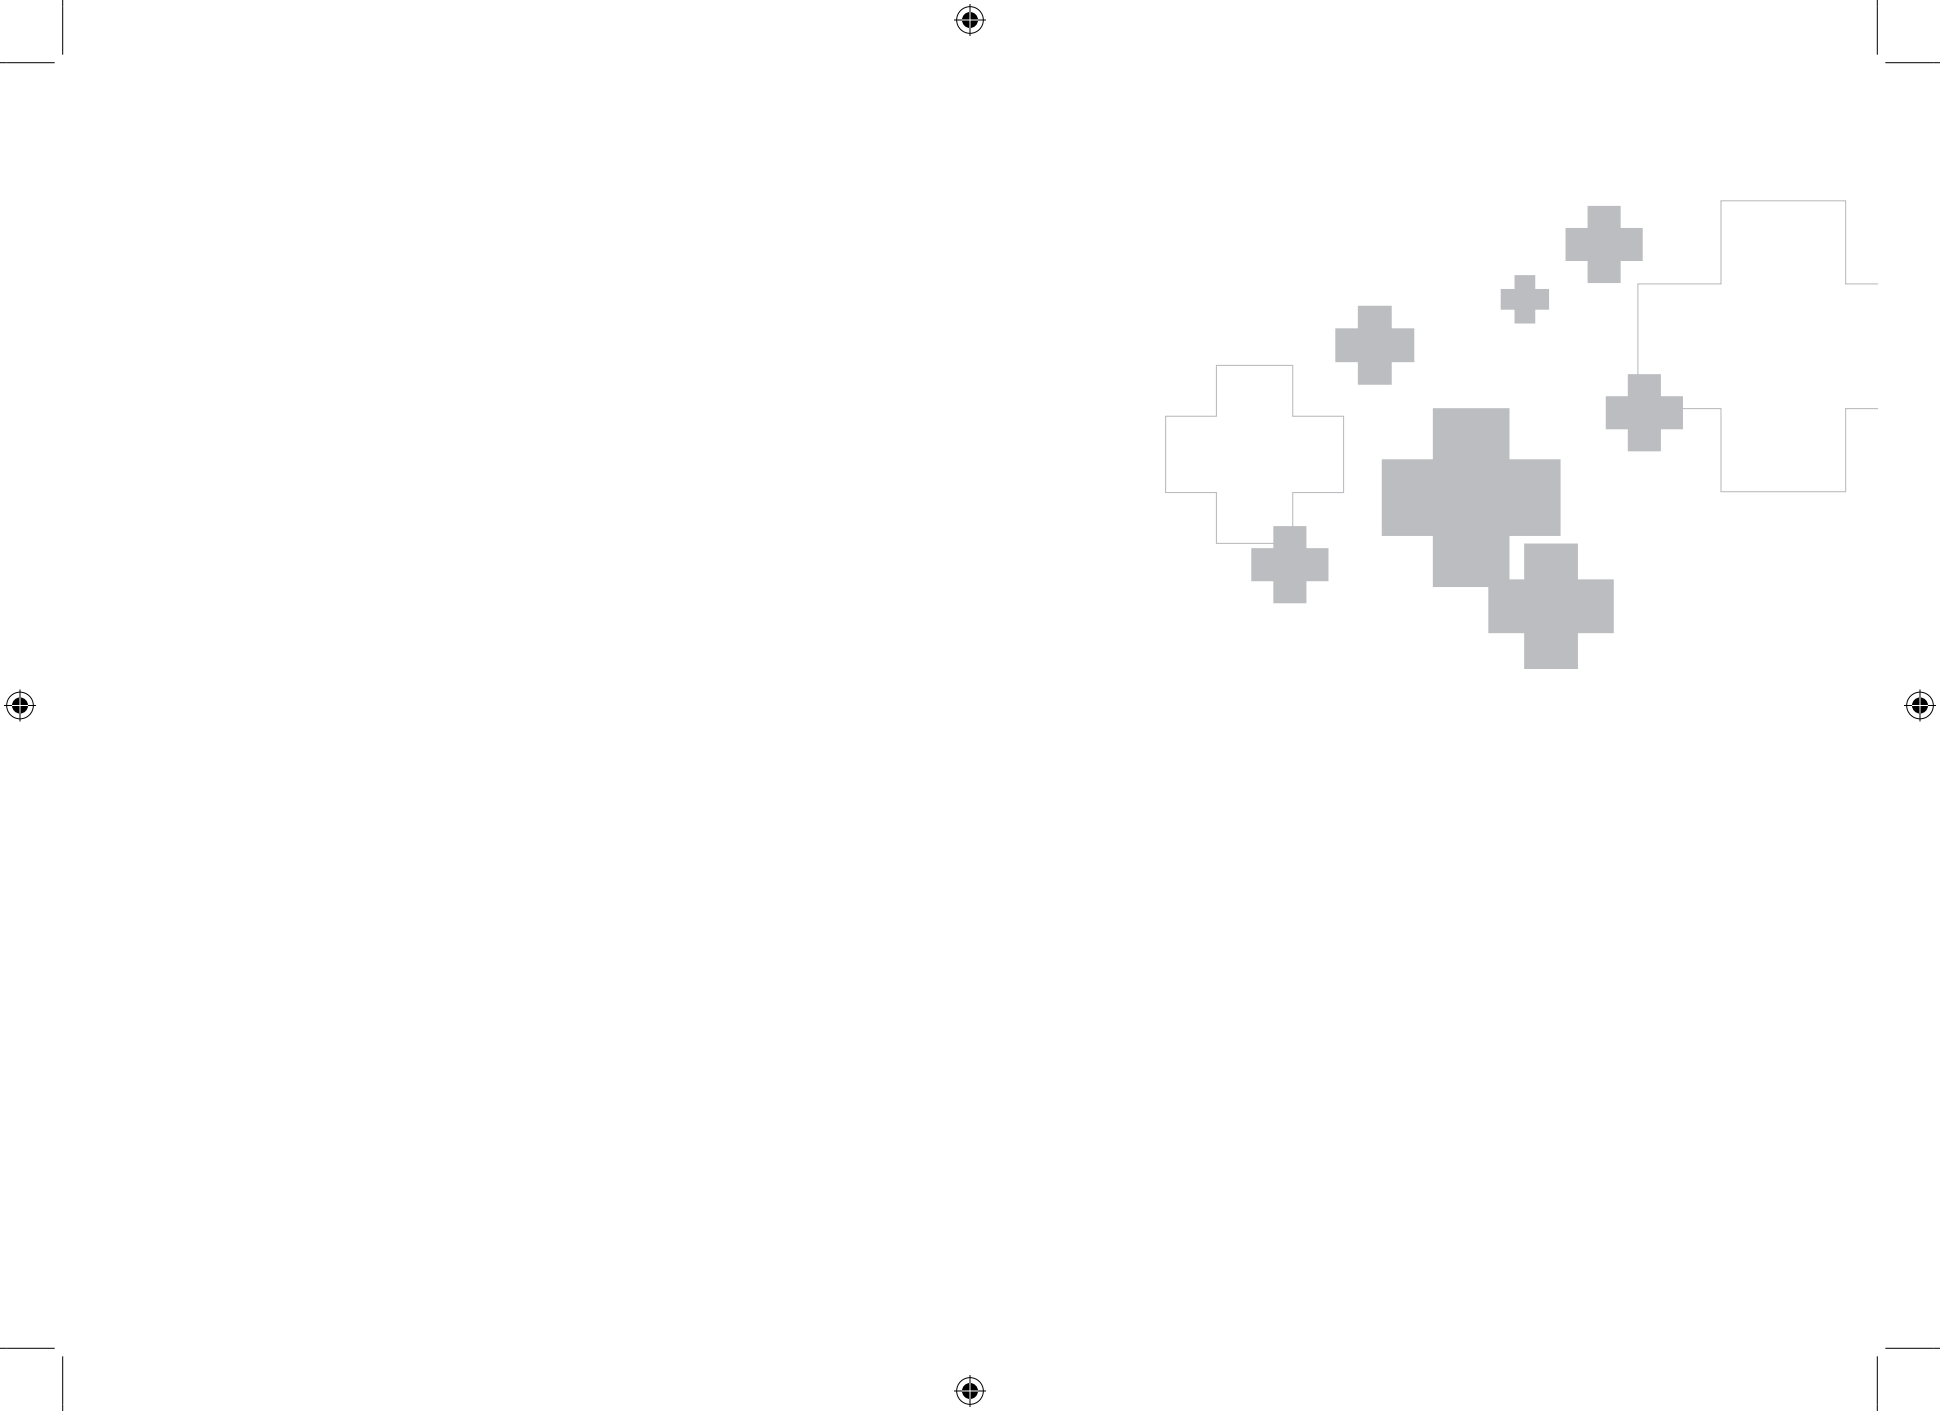

Es para mí una satisfacción poder presentar este catálogo de recursos sanitarios que año a año pretendemos se vaya incrementado y adaptando a las necesidades de los profesionales de manera que sean fuente de aprendizaje y mejora continua.

Introducción

El presente catálogo recoge las publicaciones, tanto en soporte papel como en digital, que actualmente se encuentran disponibles en los hospitales de Castilla y León así como en las dependencias de la Consejería de Sanidad. Tal recopilación ha sido posible gracias a la centralización de las compras y a la implicación de un grupo de profesionales convencidos de la utilidad y de la factibilidad del proyecto que inicialmente se concreta en el documento.

Se ha de destacar que junto a los recursos bibliográficos que aquí se relacionan, existen otros en la red de libre acceso.

Con la edición de esta publicación se pretende promover y facilitar la actualización sistemática de los profesionales sanitarios, a través del acceso a aquellas fuentes de datos (información científica, publicaciones electrónicas, revistas de resúmenes, bases de datos, alertas bibliográficas, etc.) que en cada caso puedan resultarles de interés.

El catálogo que ahora se presenta, revisable anualmente, tiene como objetivo convertirse en un instrumento de difusión del conocimiento científico, de utilidad cotidiana para la información, la formación continuada y la investigación en ciencias de la salud de los profesionales de la Consejería de Sanidad de la Junta de Castilla y León, a través de un único punto de acceso a toda la información disponible en cada momento.

La selección de los recursos bibliográficos que aquí se recogen serán objeto de una revisión sistemática en periodos sucesivos, según las nuevas necesidades, los cambios de títulos y el mundo editorial, para lograr una mejor satisfacción de las necesidades de los usuarios.

Se sientan así las bases para conseguir una adecuada organización, coordinación y optimización de los recursos disponibles en cada momento, a través de una gestión efectiva y eficiente de los fondos documentales existentes en el conjunto de los centros e instituciones sanitarias de la Consejería de Sanidad.

El proyecto requiere, como cualquier otro que comienza una nueva andadura, de la implicación y colaboración de todos los profesionales para lograr, a través de su común utilización, su mejora continua en beneficio de todos.
