

Informe VIGIRA semana 11/2026 (del 9 al 15 de marzo de 2026)

Muestras centinelas procesadas:	55
---------------------------------	----

En las muestras no centinelas, la circulación del VRS continúa descendiendo paulatinamente.

SARS-CoV-2	3,6 %
Virus de la gripe	0 %
VRS	9,1 %

The graph displays the percentage of positivity for two respiratory viruses over time. The red line represents Gripe (Flu), which shows a major peak in early 2026, reaching approximately 29%. The green line represents VRS (RSV), which remains at a low level throughout the period, with a minor peak of about 11% in late 2026.

Fecha	Gripe (%)	VRS (%)
202512	7.0	1.5
